

复旦大学数学科学学院 数学综合报告会

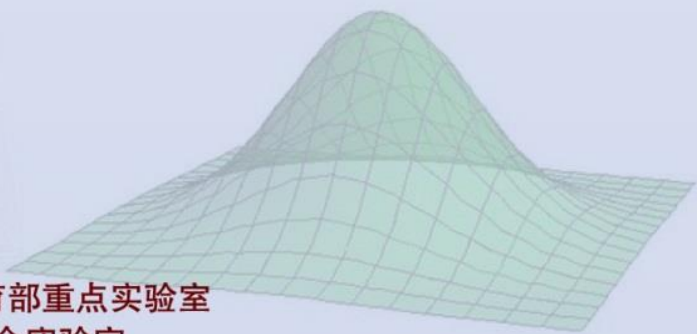

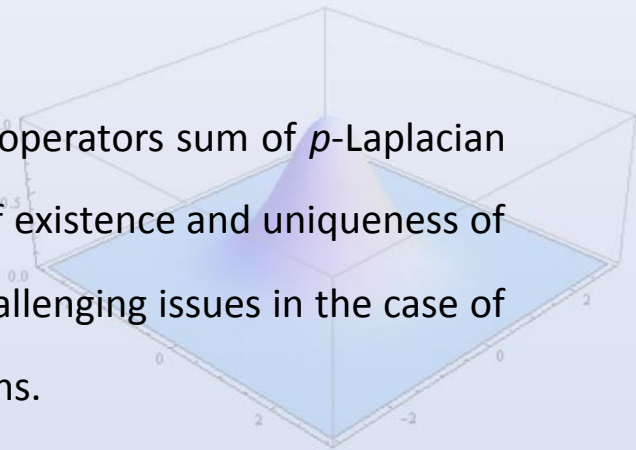

报告题目: On the sum of operators of p -Laplacian types

报告人: Prof. Michel Chipot (University of Zurich)

报告时间: 2024 年 9 月 26 日星期四, 10: 00—11: 00

报告地点: 光华楼东主楼 1801 室

报告摘要: The goal of the talk is to study operators sum of p -Laplacian type operators. We address the problems of existence and uniqueness of solutions, this last point leading to some challenging issues in the case of quasilinear combinations of such p -Laplacians.
