## **INERTIAL MANIFOLDS: THEN AND NOW**

Speaker: Sergey Zelik

## University of Surrey/浙江师范大学

Time: Wednesday, December 24th; 15:20-16:20

Venue: Room 102, SCMS

## **Abstract:**

We discuss the classical and recent results in the theory of IMs including the classical spectral gap conditions; the non-existence results for the case where these conditions are violated; some methods how they can be overcome in some interesting particular csses; etc. The smoothness of IMs as well as open problems of the theory will be also discussed.
